Your Lifelong Co-Pilot

Welcome to Round One, the leading tire and auto-service in Lebanon.

Round One offers complete auto care for your vehicle whether it's a routine check, maintenance, or repair services on your wheels, brakes and more. We are ready to serve you.

Round One, The Initiation

Round One was founded in 2018, bringing modernity and state-of-the-art auto repair and soft maintenance to Lebanon. Reputable for its professional, reliable, and quality service, Round One is the go-to trusted partner for thousands of motorists who rely on us to keep their vehicles safe and top-performing.

SAKA Trading Co.

Round One is part of SAKA Trading Co., founded by Mr. Sleiman Abdul Khalek in 1960.

SAKA Trading Co. markets & distributes an extensive portfolio of tires, batteries, lubricants, garage equipment, brake system, filters, tools and accessories and caters to more than 1,200 tire service centers, fleets, and companies in Lebanon, Zimbabwe, Liberia, Senegal, Cameroon, Guinea (Conakry), Gambia, Gabon, Libya, and Iraq.

We created Round One to realize the need for a high-profile division to better serve passengers and their vehicles alike.

Advantages of Our Services

We make it our mission to always improve your experience at Round One.

Utmost Care:

It's not just about your car!
It's also about YOU and your
safety first!

Guaranteed Safety

Your safety is our top priority.
That's why our team will go the
extra mile so you can go all the
way safely.

Quality and Experience

Our highly-trained team of
experts will ensure you get your
vehicle well maintained and will
advise you on the best products
to meet your needs and budget.

Mission, Vision & Values

Mission:

We provide our customers with state-of-the-art preventive and detective vehicle services and repairs with excellent products, equipment, and a highly trained team. To grow, we believe we strive to operate effectively and surpass all expectations.

Values:

To gain the trust of our partners and customers we aim to operate every day as if we are your racing team where lives depend on us working effectively and responsibly. Our core values are:

- Teamwork

A planned and coordinated team to achieve our goals

- Integrity

All team members are committed to the ethical code

Vision

To become your “lifelong co-pilot” with a highly respected, world-class vehicle maintenance company and a strong global brand identity that earns the trust of our customers.

- Safety

Safety first and absolute accountability in everything we do

- Enthusiasm

Passion for improvements in service delivery and customer experience

- Service

Dedication to being the number 1 choice for exceptional service.

Round One Tires and Auto-Service

Keep your vehicle well maintained to prolong its life, increase its fuel efficiency and decrease the risk of damages or accidents. At Round One we provide you with world-class professional expertise, quality parts, products and customized care to fit your needs.

A close-up photograph of a tire being worked on by a machine. A gloved hand is visible, holding a yellow tool or part of the machine. The tire has a deep tread pattern.

Tire Services & Repairs

Tires can take a lot of damage that's why you should consider caring for their health for a longer durability.

- Tire Rotation
- Tire Repair
- Tire Change
- Wheel Balance

Tire Rotation:

At Round One we advise you to bring over your vehicle twice a year to our branches where we can rotate your tires to preserve them. If ignored, your tires will wear out at different rates shortening their life.

Tire Change:

When your tires are about to retire, Round One will help you select the best tire for your driving preferences. The services we provide include removing and ensuring a safe installation of your brand new tires.

Wheel Balance:

Vibrations are often induced by balance issues with the tire and rim, at Round One we can measure and detect the cause of the vibrations so later we eliminate them for you to have a trembling free trip.

Tire Repair:

We'll repair your damaged tires by removing the tire from the rim and having it inspected for damages; liner repair, checking for punctures to fill and then reinstalling it back on your vehicle after balancing it.

Oils & Lubricants

As an important element to keep you safe and keep your engine running smoothly, regular oil service is vital to the long-term life of your vehicle's engine.

- Engine Oil Change
- Brake Fluid Change
- Differential Oil Change

Brake Fluid Change:

At Round One we know that the brakes' health is a vital part to keep you safe on your trips. That's why, we offer to inspect when it is the right time to change your oil fluid to keep your brakes performing at their best.

Differential Oil Change:

To protect the metal components in your vehicle's gears and enhance overall performance, Round One will inspect and, when necessary, replace the differential oil. This ensures smoother rotations, improved turns, and better road grip for a safer, more enjoyable drive.

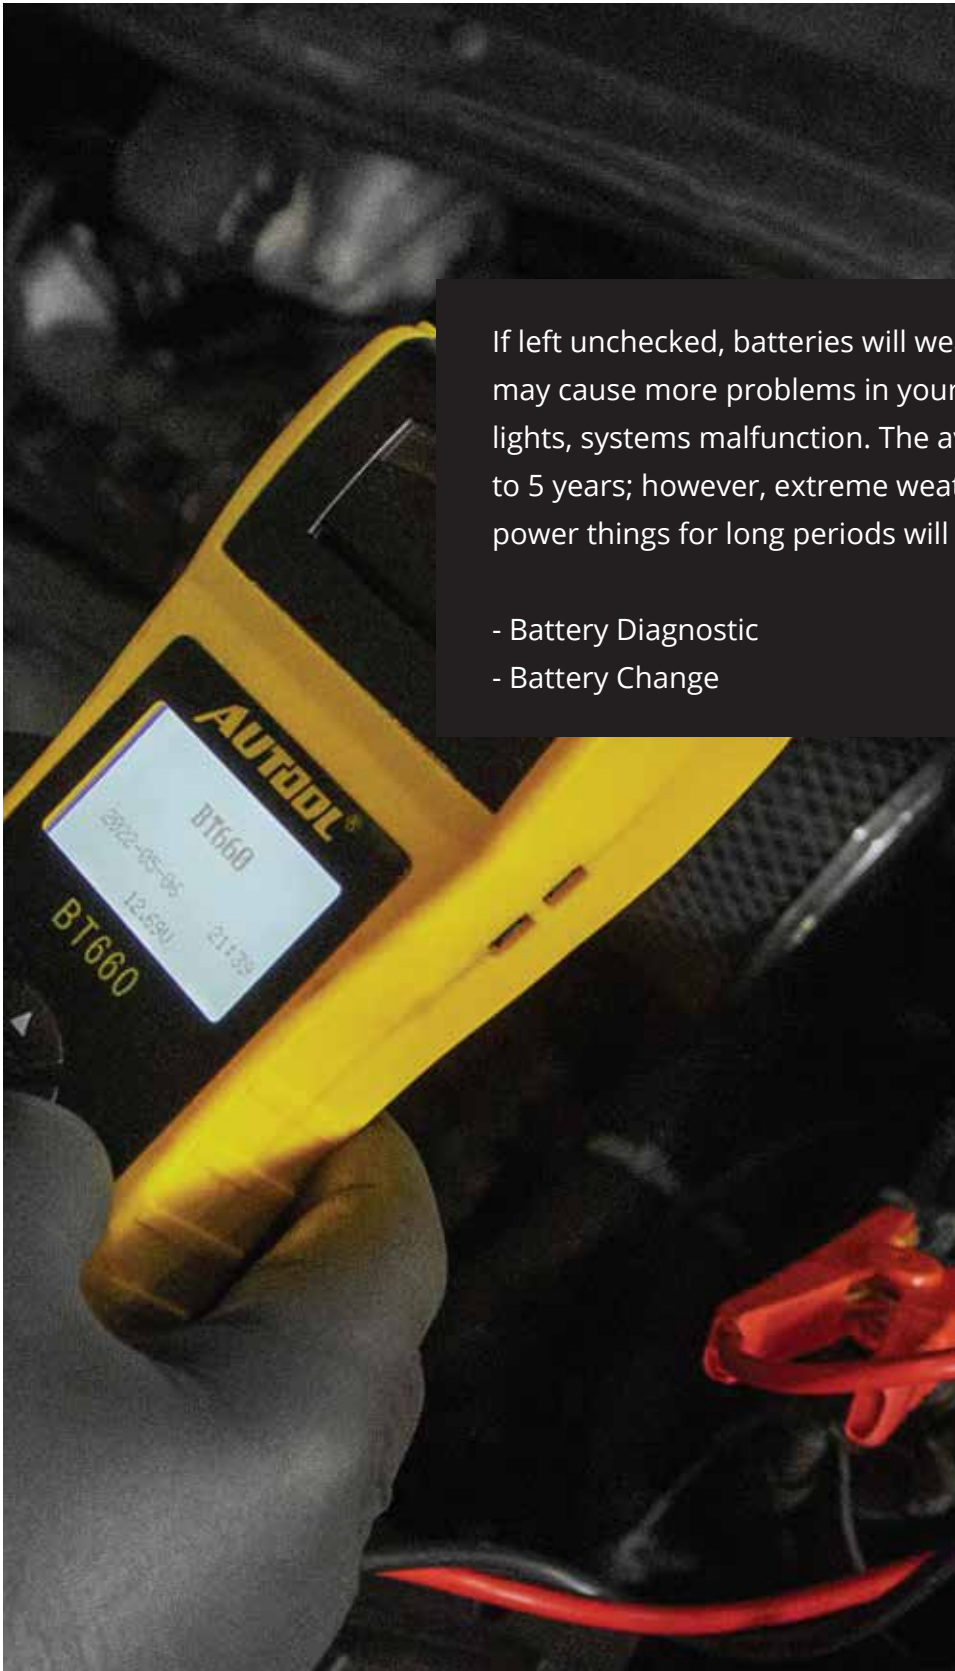

Engine Oil Change:

Round One team will keep your engine performing at its best with the regular oil and fluid inspection and change. Check our products page for our full and trusted range of oils and lubricants.

Batteries

If left unchecked, batteries will weaken over time and this may cause more problems in your vehicle: slow starting, weak lights, systems malfunction. The average life of a battery is 3 to 5 years; however, extreme weather and using the vehicle to power things for long periods will shorten its life.

- Battery Diagnostic
- Battery Change

Battery Diagnostic:

A battery's health is important and keeping track of it helps in avoiding tough situations like failing to start your vehicle. We will inspect and test your battery and replace it when necessary.

Battery Change:

Batteries are meant to last and your vehicle deserves the reliability built into every battery. At Round One we offer a wide range of batteries you can choose from and install on spot by our experienced team.

Suspension & Steering Services

Vehicle handling can get tough and hard to manage especially on damaged or bumpy terrain, this means your suspension parts are weakening and could become defective with time.

- Suspension Parts Inspection & Change
- Steering Parts Inspection & Change

Suspension Parts Inspection & Change:

It is essential to bring over your vehicle with weak control, as we can check where the issue lies & fix it. This service includes strut, strut mount, and damper inspection.

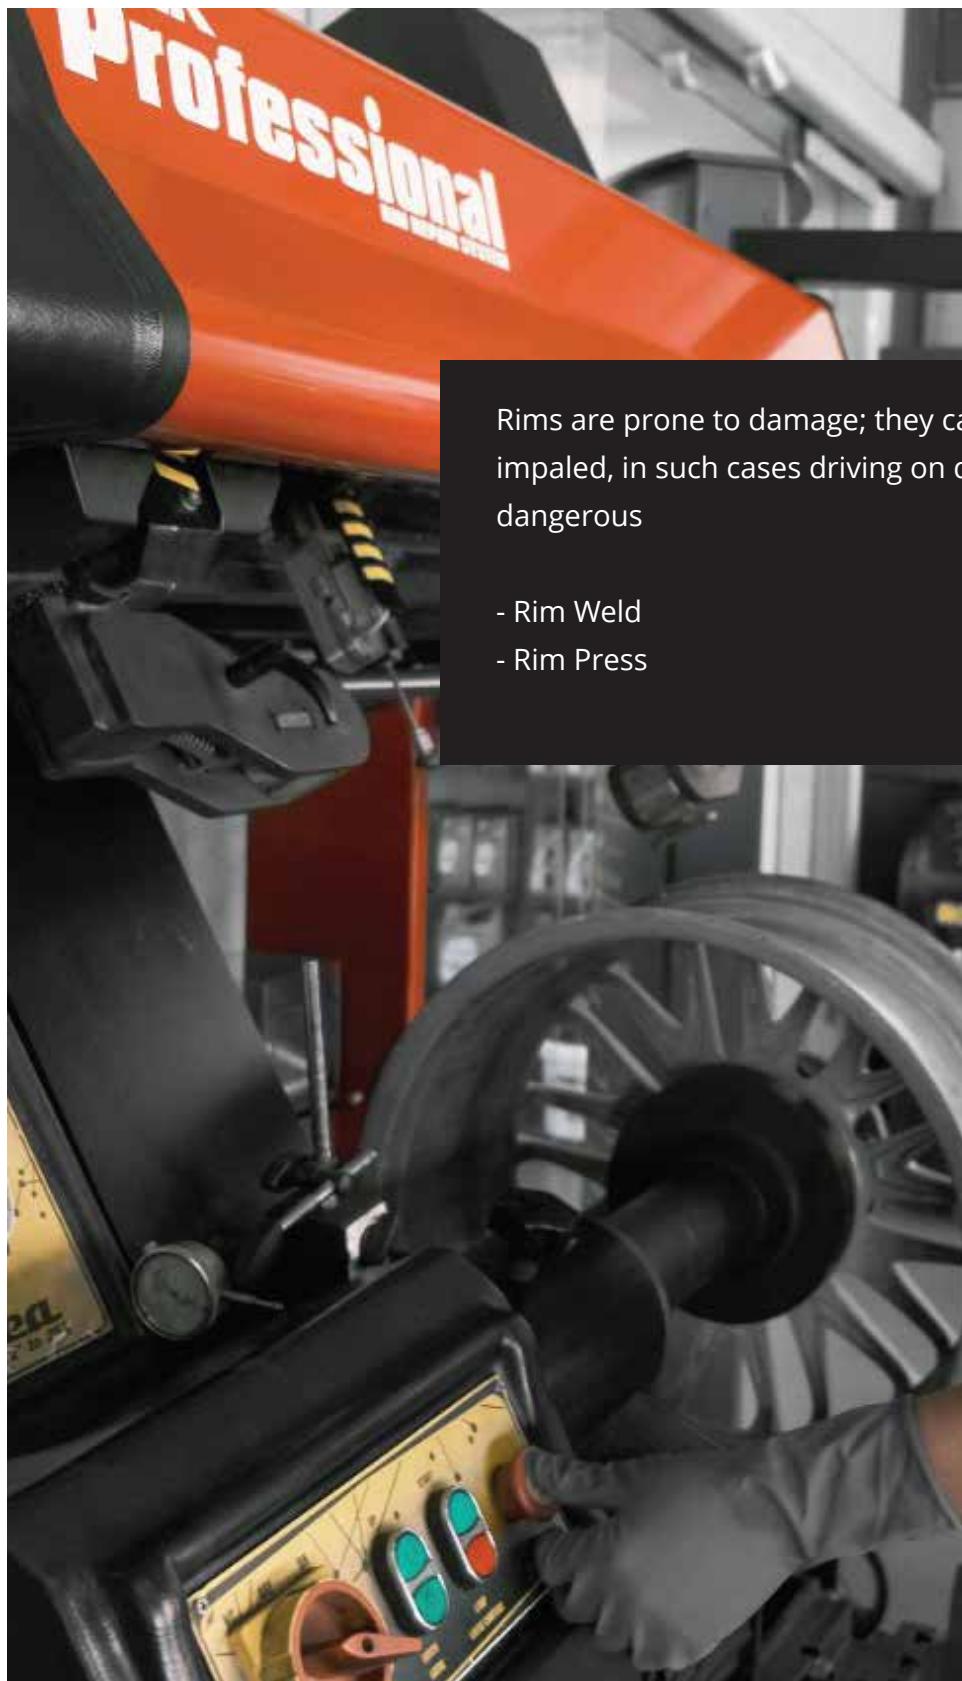

Steering Parts Inspection & Change:

Steering issues can manifest in noises coming out of your vehicle, vibration, looseness in the steering wheel and pulling to one side. We'll have your vehicle undergo a full inspection, then change the parts needed.

Rim Services

Rims are prone to damage; they can crack, break and get impaled, in such cases driving on damaged rims can be very dangerous

- Rim Weld
- Rim Press

Rim Weld:

Keeping with international safety standards and practices, we will fix the cracks on your rim that can keep you on the road up until new rims are installed.

Rim Press:

We can adjust your bent rims and smooth them out so they don't affect your handling or damage your tires.

Brake System

Brakes suffer, wear and tear the most in your vehicle and they need to be replaced periodically.

Look for any signs like: scrapping, grinding, hissing, and car pulling to one side when you brake.

- Brake Inspection
- Brake Repair
- Brake Fluid Change

Brake Inspection:

Always have your brake pads, rotors, shoes and hydraulics inspected. Our professional team can help, knowing well the importance of having a healthy and functional brake system.

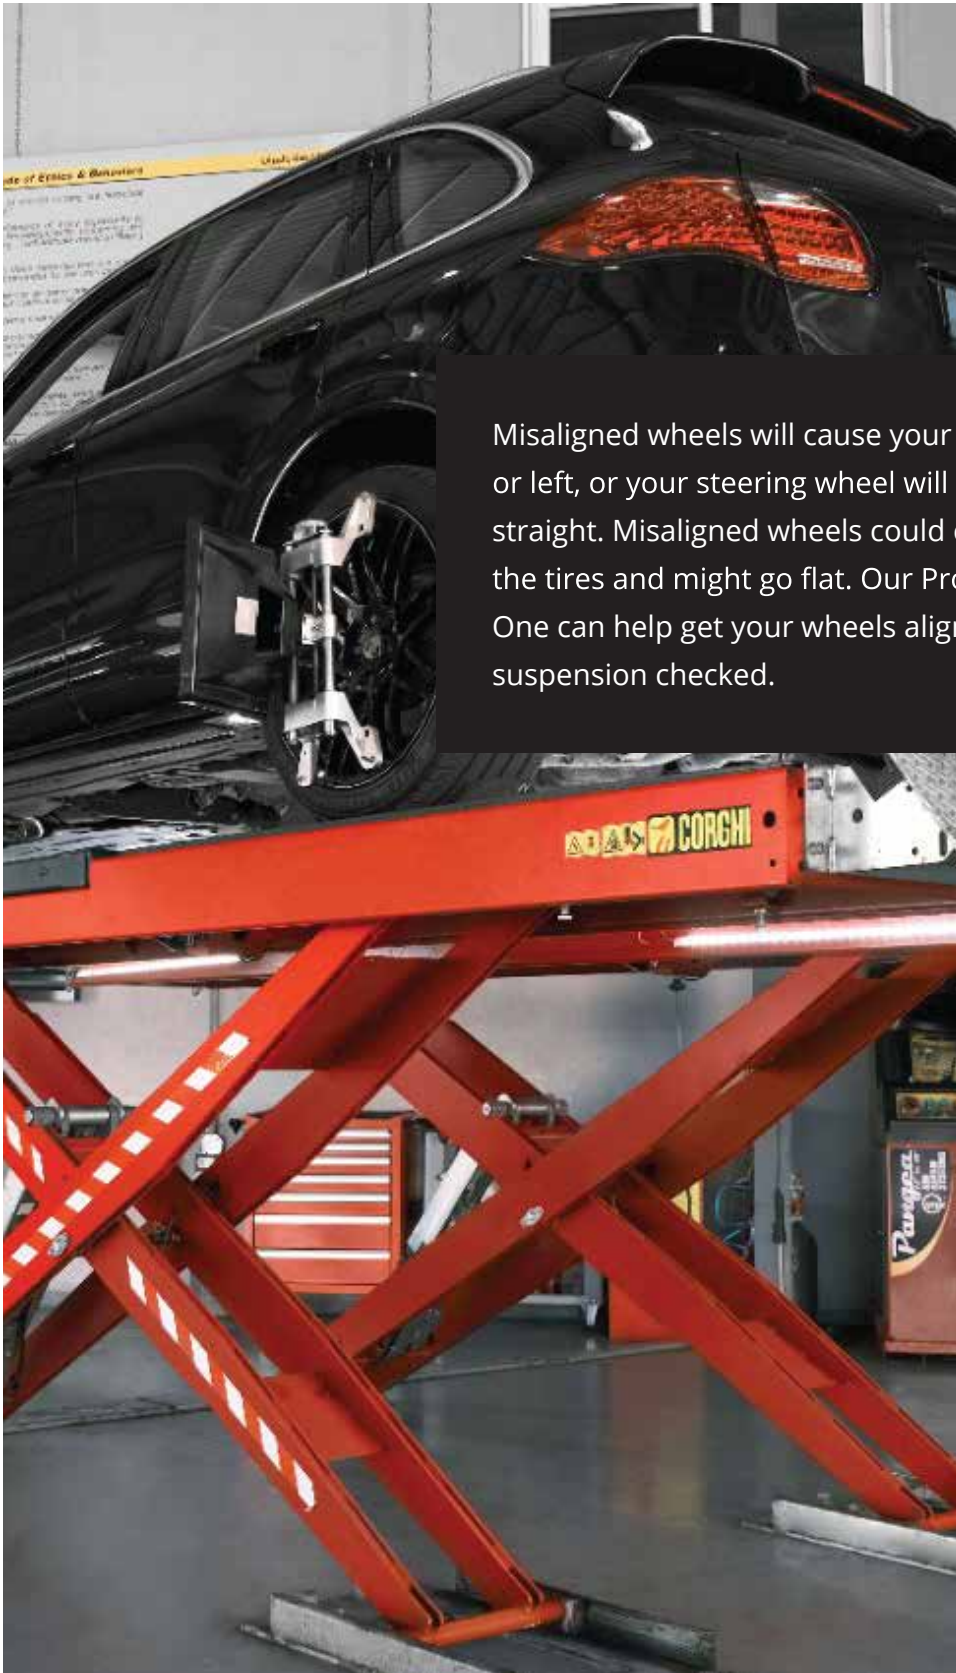

Brake Fluid Change:

At Round One we know that the brakes' health is a vital part to keep you safe on your trips. That's why, we offer to inspect when it is the right time to change your oil fluid to keep your brakes performing at their best.

Brake Repair:

Brakes can get damaged with usage and it is our job to inspect and repair them. Our services include hardware installation, drum inspection, rotors, pads, shoes, hydraulics and cables.

Wheel Alignment

Misaligned wheels will cause your vehicle to pull to the right or left, or your steering wheel will be off-center when driving straight. Misaligned wheels could cause extra wear on one of the tires and might go flat. Our Professional team at Round One can help get your wheels aligned and your steering and suspension checked.

Nitrogen Inflation

Loss of pressure is slower because the gas in the tire escapes more slowly than air does. With a more stable pressure, you'll get better gas mileage and get full tire life since you're always rolling on fully inflated tires. Ask one of our service advisors about the whole benefits of this service.

Filters

As they age it is important to check when to change your filters since they are essential for both your health and that of your vehicle; as they keep the dust from entering your system and your car engine.

- Engine Oil Filter Change
- Air Filter Change
- Cabin Filter Change

Engine Oil Filter Change:

Changing your engine oil without installing a new oil filter will not insure the durability your new oil promises. We will make sure that your engine performs its best with clean oil cycling through its parts by installing a new filter each time you visit us for oil change service.

Air Filter Change:

Round One team will inspect your vehicle's filter and change it if needed. It's important to replace old filters with new ones to maintain the engine's power and prolong its life.

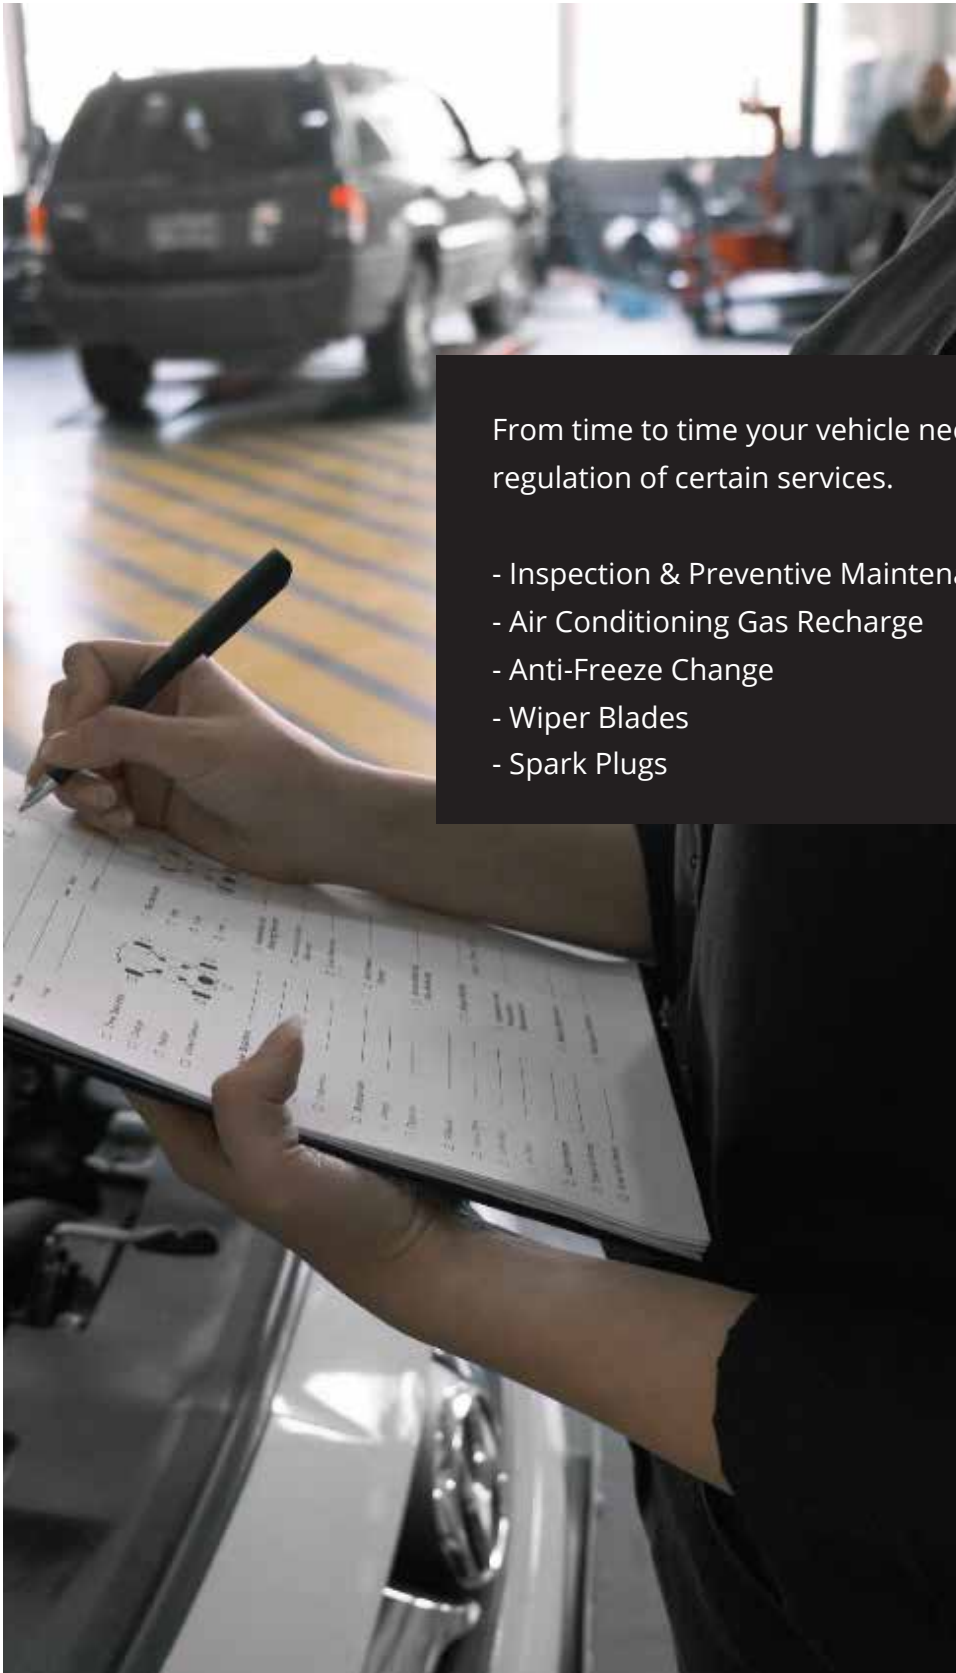

Cabin Filter Change:

By isolating the vehicle cabin from the dust, pollen and exhaust, the cabin air filter keeps the air inside the vehicle safe to inhale, and since the most important thing is your health, we work on providing the check-ups and replacement of cabin air filters to ensure you and everyone in the vehicle are breathing air of good quality.

Routine Services

From time to time your vehicle needs inspection and regulation of certain services.

- Inspection & Preventive Maintenance
- Air Conditioning Gas Recharge
- Anti-Freeze Change
- Wiper Blades
- Spark Plugs

Air Conditioning Gas Recharge:

We provide services that include gas refill and inspection so that you can adjust the interior heat of the car as desired.

Antifreeze Change

For the engine to work at its best and maintain its heat at the level needed, we can help with filling your coolant and flushing the radiator so it doesn't corrode.

Wiper Blades:

With age and usage, blades get stiff and cracked and can leave streaks behind. When this happens, it's hard to see clearly – and it's time to replace your windshield wipers. Service includes removal of old wiper blades, and installation of new ones, on the front, rear or both.

Inspection & Preventive Maintenance

Round One team will do a whole check-up on your vehicle to be sure whether it needs any maintenance. Regular check-ups keep your vehicle healthy.

Light Restoration Service

We will make sure that you have an enhanced visibility, appearance and safety by polishing the headlights with our advanced tools and using our advanced procedures.

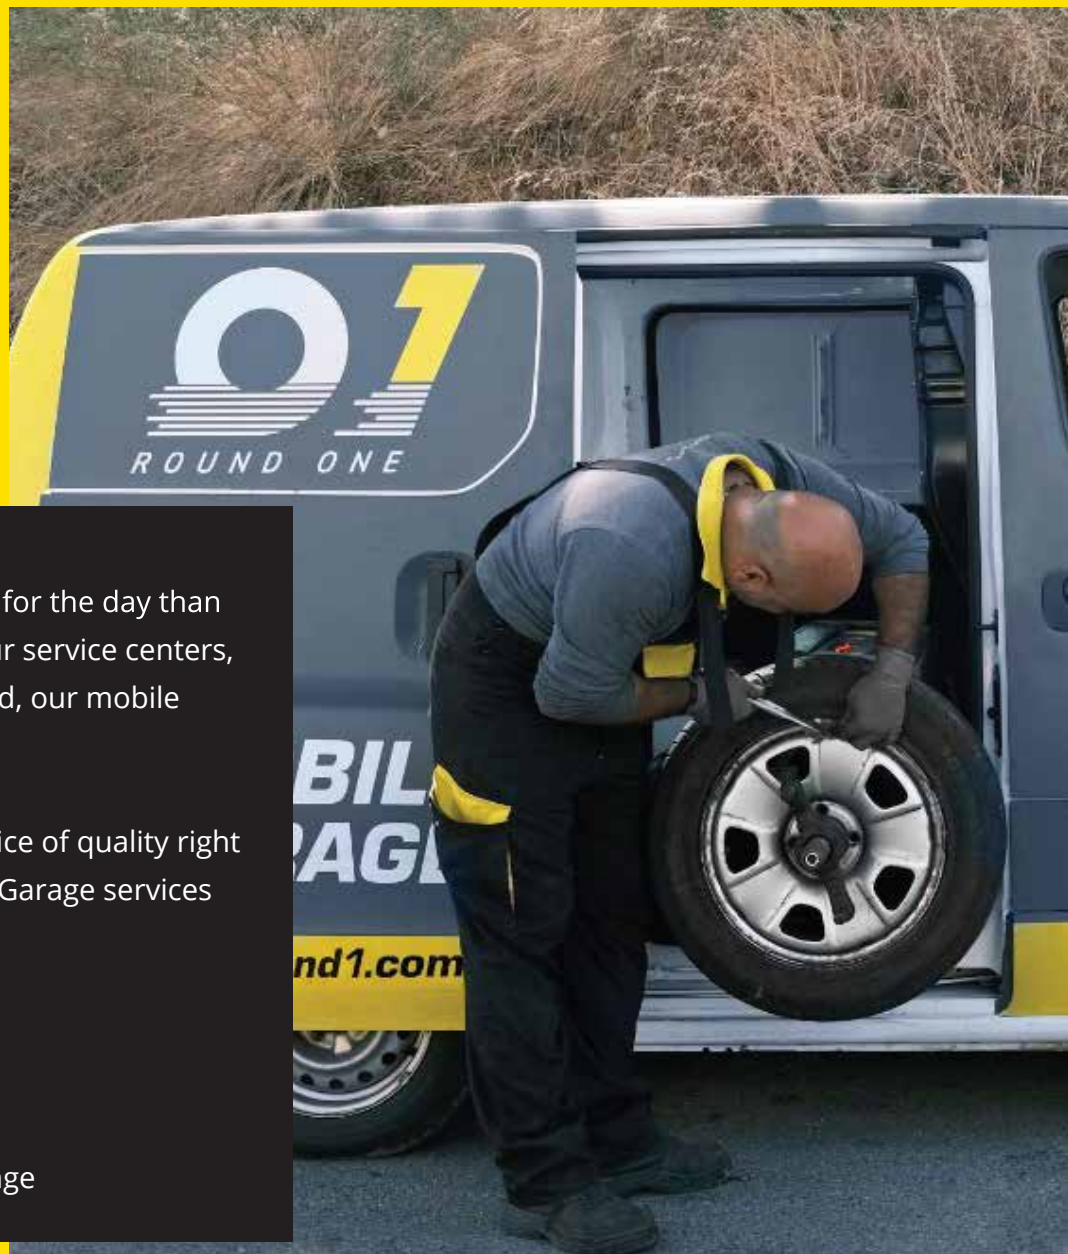

||| - Mobile Garage

When you have different plans for the day than to bring over your vehicle to our service centers, but you need to have it repaired, our mobile garage is at your service!
